

ABSTRACT OF THE DISCLOSURE

Disclosed is a resin composition for forming sheets for ink printing comprising from 30 to 90% by weight of an ink-absorbent resin (A) and from 70 to 10% by weight of an ink-unabsorbent resin (B). When ink is printed on a sheet for prepared from the resin composition, a high-quality printed material can be obtained while effectively preventing the ink from blotting and the sheet from cockling.
